

3/18/20

Good morning BCS families!

BCS will begin delivering food to all of our families this morning (unless other arrangements have been made). Today, students will receive breakfast and lunch for today and a breakfast for tomorrow. After today, students will receive lunch for the delivery day and breakfast for the next morning. If you are in need of additional food for your family, please do not hesitate to contact the district.

We are working on a plan to distribute academic materials to students through the remainder of the week. Please remember, our closure is not a vacation and students are expected to complete school work. Our teachers are planning lessons and developing systems to monitor student work completion. Please do not hesitate to contact a teacher if you need assistance. All District e-mail addresses are on our web page at www.belfastcsd.org.

BCS is also working with our community to increase Internet access throughout the District. Mr. Morgan has set up connections at the Caneadea Town Hall and Oramel Fire Department and will be setting up a third connection at the Belfast Town Hall. BCS is grateful for the community support. If a student needs to use the new Internet drops to upload and download instructional material, families can park in identified areas to connect to the Internet for the time it takes the student's device to sync. Please do not sit in the parking areas for longer than needed.

Parking Areas:

Town of Caneadea- far side of the parking lot or across the street

Town of Belfast- across the street from the town building, by the park

Oramel Fire Dept.- along the side of the building by the mailbox, not in front of the building

Internet Connection Information:

SSID: kajeet smartbus

Password: smartbus

The Belfast Public Library also has free WIFI that students can access. The password is belfastlib.

Again, I want to thank you for your support as we work to support our students in a very challenging time.

Dr. Butler
